PREMIER RESIDENTIAL AND COMMERCIAL ENVIRONMENTS

HARMONY
DESIGN GROUP

**Award Winning Landscape Architect
Design & Build
Construction Management**

Harmony Design Group, a New Jersey Certified Landscape Architecture firm, is committed to providing innovative custom landscape designs that indulge your senses and transform an ordinary yard into a breathtaking landscape oasis. We cultivate lasting relationships with our clients to create better living environments, with emphasis on custom, quality design and craftsmanship. Our ongoing commitment to client satisfaction and meticulous planning assures a finished product that will provide a lifetime of enjoyment.

Marc Nissim is the founder and creative force behind Harmony Design Group, one of New Jersey's leading residential landscape design firms. Marc's passion for design began as a boyhood fascination with drawing, architecture, and gardening. At the age of 15,

Award winning designs recognized in
New Jersey Nursery Landscape Association
Northeast Pool and Spa Association

Private Paradise

he started his own successful landscape maintenance business and began to learn many of the innovative methods he still uses today. After graduating from the University of Connecticut with a degree in Landscape Architecture, Marc worked for several prominent landscape design-build firms in New Jersey before starting Harmony Design Group.

Marc's designs have won numerous awards with the New Jersey Nursery and Landscape Association and the Northeast Pool and Spa Association. His construction experience and design creativity make Harmony Design Group a leader in the residential landscape design.

Design and Implementation Easy as 4 Simple Phases

1. Initial Client Consultation

The Design Process begins with a consultation between you and a Certified Landscape Architect to discuss the scope of the project, touching on design elements, vision, and budget.

2. Conceptual Design/ Sketches

A conceptual design(s) will be created harmonizing your desired vision, the natural features of your property, and the architectural style of your home. Throughout the creative process, we work in partnership with you to develop a design that encompasses your vision.

3. Design Development / Technical Working Drawings

Once the preliminary plans have been agreed upon, we will work with you to finalize details (e.g., specific plants, lighting, material selections) and begin working on the Construction Drawings. In most cases, these will include: Construction Layout Plan, Planting Design, Lighting Location Plan, and Construction and Planting Details. The Construction Drawings will enable accurate pricing, ultimately eliminating costly field changes during construction.

4. Construction/ Implementation

Harmony Design Group recognizes that each landscape project is unique, requiring a specialized set of skills to complete. Most projects require specialized trades to complete the design. Depending on the scope of the project, one or more of the following disciplines may be required: Masons, Pool Contractor, Carpenter, Electrician, Plumber, Excavator, Arborist, Irrigation Contractor, Low Voltage Lighting Contractor, Landscape Contractor, Asphalt Contractor, Synthetic Putting Green Installers, and Fence Contractor.

Harmony Design Group manages all projects from start to finish, including the assembly and management of the appropriate team necessary to complete your design.

With the design and installation in the hands of Harmony Design Group, there is a single point of contact and responsibility for quality, cost, and schedule adherence.
